Backline

The band will provide their own backline, which includes the following equipment:

Rhythm Guitar

- 1 x Orange Tiny Terror head (15/7 W switchable)
- 1 x Orange PPC112 speaker cabinet 1 x 12 speaker
- 1 x Pedalboard powered by Truetone 1 Spot 9V Power Supply
- 1 x Shure SM58
- 1 x Microphone stand

Lead Guitar

- 1 x Line 6 DT25 Combo with 1 x 12 speaker (25/10 W switchable)
- 1 x Pedalboard powered by Cioks DC7 Power Supply

Bass Guitar

- 1 x Markbass Little Mark III Black Line digital bass amplifier head (800 W)
- 1 x Markbass MB58R 104 PURE (8 Ohm) 4 x 10 bass speaker cabinet
- 1 x Pedalboard powered by batteries

Drums

- 1 x 4-piece Pearl Decade drum kit (1 x bass drum, 1 x snare, 1 x tom, 1 x floor tom)
- 5 x Cymbals (1 x hi-hat, 1 x ride, 2 x crash, 1 x splash)

Vocals

- 1 x Shure SM58
- 1 x Sennheiser IE 100 PRO in-ear monitors (wired)
- 1 x Microphone stand

Stage Decoration

- 1 x Banner (300cm x 200cm)

PA-System

The PA, provided by the organizer, needs to be of sufficient quality/power for the venue. We are however flexible and can provide some of our own gear (as outlined below) in case the venue does not have access to certain materials, if communicated in advance.

In an ideal situation, the venue PA system includes:

- Venue speaker system
- Mixing desk
- 2 x Vocal Microphones
- 1 x Drum Microphone set
- 3 x Guitar/Bass Microphones
- DI boxes
- Wiring
- USB input to play intro music
- 5 x on-stage monitors
- A sound engineer who can set up, connect, dismantle, and operate the complete audio installation

Our preferred method of connecting to the PA is through miking the instruments/amplifiers.

The bass amplifier and one of the guitar amplifiers (Lead) have speaker-simulated DI outputs available if there are not enough microphones present.

If needed, the band can provide the following equipment, if communicated in advance:

- Variety of cables (TS, TFS, XLR...)
- 1 x Kustom KPC12MP Floor monitor (100 W)
- 1 x Behringer Xenyx Q502USB (5 channel mixer, 1 mic input, 4 line inputs, L/R master output)
- 3 x Shure SM58 (dynamic microphone)
- 1 x Samson Q7 (dynamic microphone)
- 1 x AKG D5 (dynamic microphone)

- 1 x AudioTechnica AT2050 (large diaphragm condenser microphone)
- 2 x RODE NT5 (small diaphragm condenser microphone)
- 1 x Yamaha EAD10 (basic drum microphone kit, outputs double mono L/R instrument TS cable)
-

Monitor setup

The required monitor setup depends on the size of the venue/stage. While not ideal, for smaller venues, it is possible to play without a PA system and with a single monitor for our vocalist. Please refer to the below table to see the required monitor equipment per stage size:

User	Small (bar)	Normal (club)	Large (festival)
Vocalist	X	X	X
Rhythm guitarist		X	X
Lead guitarist		X	X
Bassist		X	X
Drummer		X	X

Stageplan

We are flexible in terms of stage setup depending on the venue. If possible, please provide mounting options for our banner (300cm x 200cm).

We require a minimum of 6 free power outlets (Type E / Type F) on stage for the band to use. Ideally 3 at the rear of the stage, and 3 at the front of the stage (mainly near the guitar and bass players).

In general, we try to achieve the following ideal stage plan:
